

UniSat UNEPG – Linux Test Report

Part 1 : General test results

Index	Student	Score
1	Mardenova Leila Kalkamankyzy	130.0
2	Aruzhan Kenzhebek	130.0
3	Kudaibergenova Orissim	115.0
4	Kurmangali Dana	130.0
5	Кошкимбаева Жания Ердоскыз	115.0
6	Aruzhan	140.0
7	Ungarova Nazym	90.0
8	Assel	82.5
9	Nurmukhanbetova Laura	127.5
10	Sadu Amina	115.0
11	Zhalimbetova Inkar	105.0
12	Aigerim Altayeva	125.0
13	baitukaeva_dana	60.0
14	Zhanna Suimenbayeva	135.0
15	Tulepbergen Sagynysh	135.0

Part 2 : Test Data Analysis

Total Participants: 15

Heighest Score: 140.0

Lowest Score: 60.0

Avarege Score: 115.66666666666667

Standard Variance: 22.60820542150465

Data Analysis Result

According to the comprehensive analysis of the various data above, it is found that :

1. The students' overall academic performance is good.
2. Students have a strong overall acceptance of the course.
3. The difficulty of the course is moderate.
4. There is a big difference between the highest and lowest grades of students.

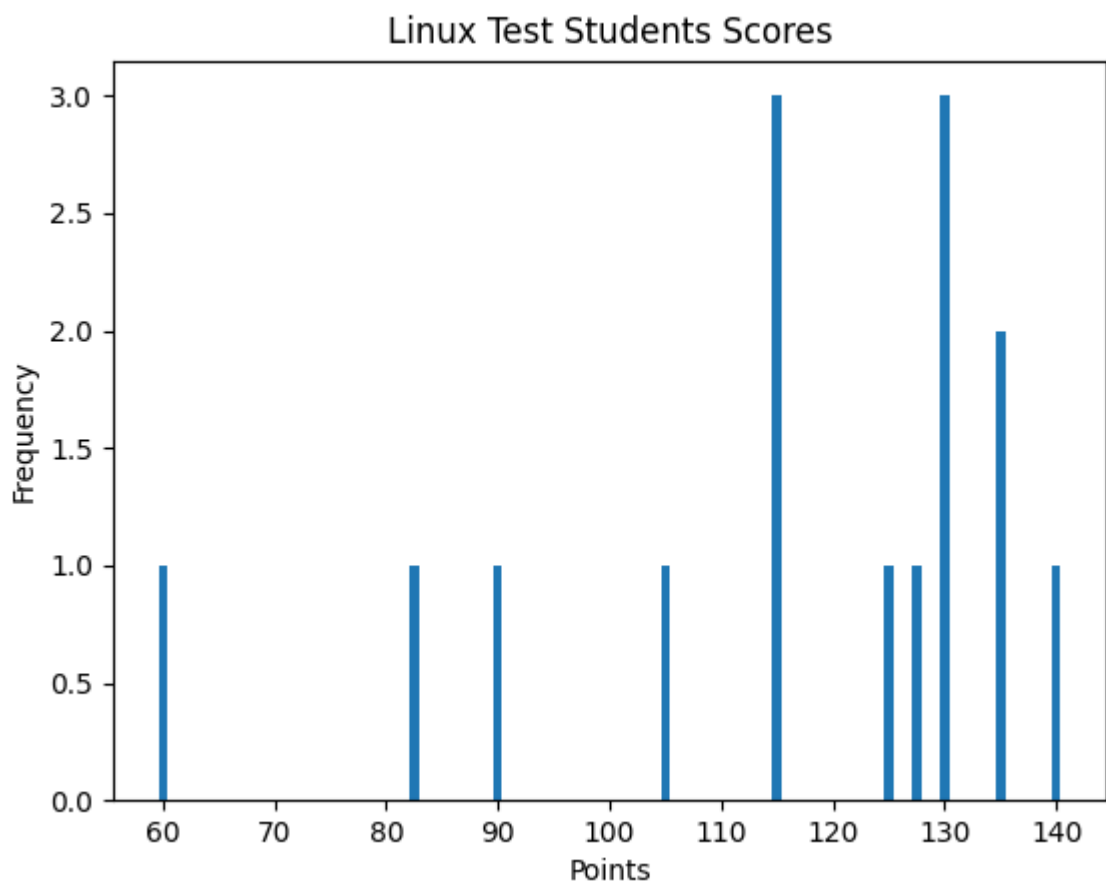

5. The standard deviation of student performance is relatively large.

Areas for improvement

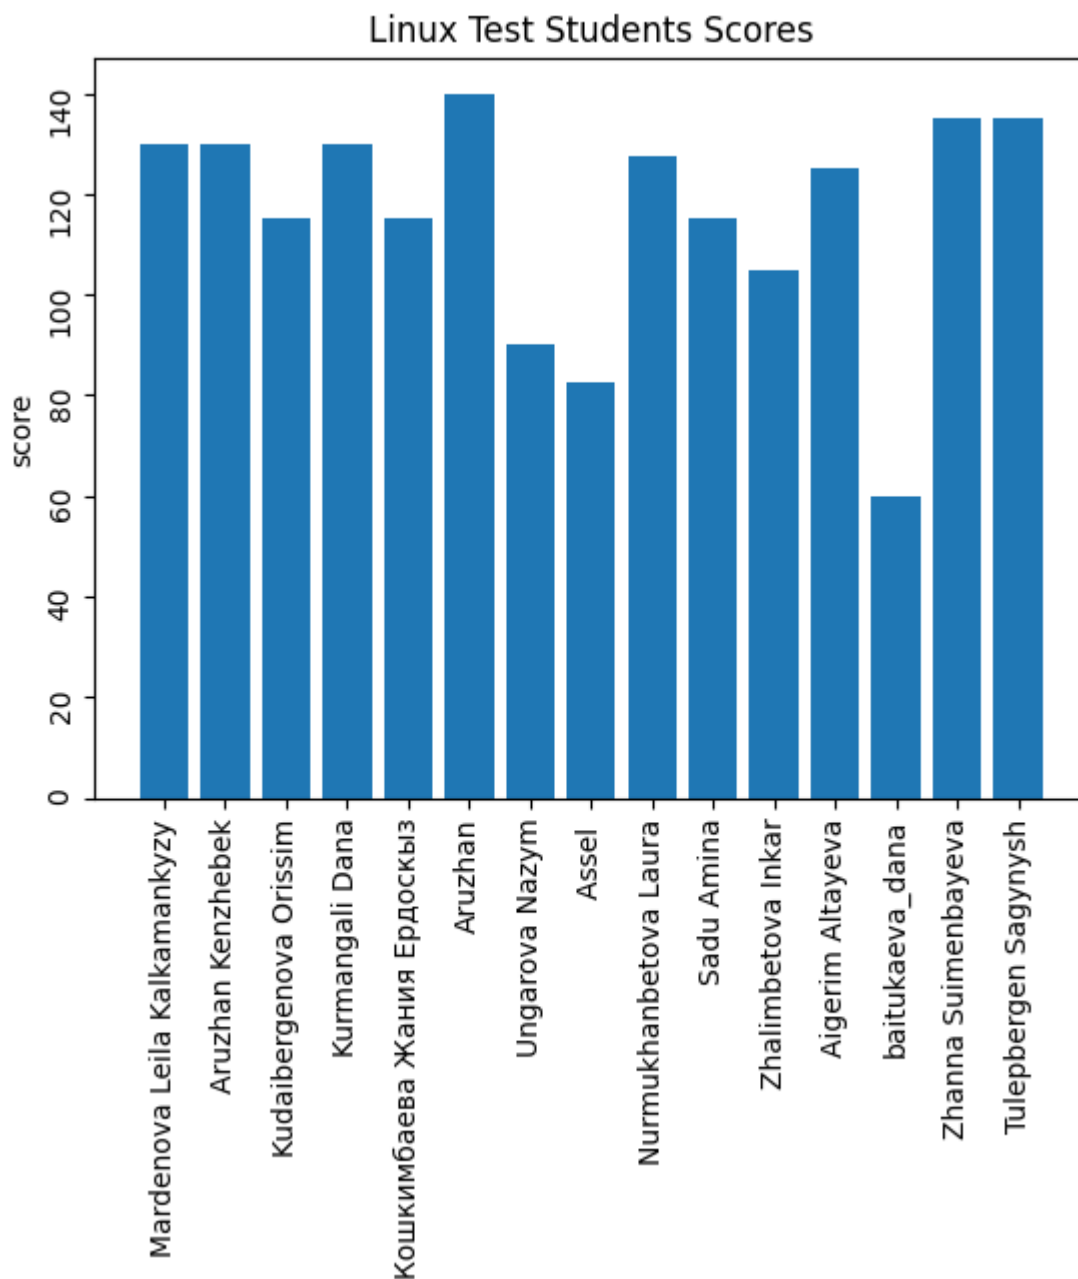

According to the large variance of student achievements, it can be found that students have different levels of cognition due to factors such as age and academic qualifications. Therefore, for certain more difficult courses, students can be divided into different groups according to the learning situation, give certain groups more help and guidance.

Part 3 : Data Visualization

1.

2.
